PROFESSIONAL SUMMARY

A Computer Science and Engineering student with three internship experiences possessing 2.5+ years of hands-on professional knowledge in Data Science and Machine Learning with a 4+ years overall coding experience. Comfortable with working in a team and also leading it. Constantly keeping myself updated here having a vision to see myself working professionally in this field.

INTERNSHIP EXPERIENCE

Myways	Machine Learning Trainee	Aug'21 – Oct'21 (3 Months)
<ul style="list-style-type: none">Explored Different Recommendation systems like content, collaborative filtering made the models from scratch and used in different kind of data, analyse different data output where the wrong parts were happening fixed those for good accuracyAsked minimum question to each user so they won't get bored, predict the right pathway and the content depends on answers		
CDAC- Kolkata	Research Intern	Apr'21 – Aug '21 (4 Months)
<ul style="list-style-type: none">Explored some Security methodologies to check an URL is phishing or not, then build a Machine Learning Model for that, If the URL belongs to a Google Form it'll Scrap and will show the information is asking there and analysis those are safe or notDeveloped a process where a user can send a twitter id and the model will scrap whole first page tweets and take URLs from the tweets and expand each URL then predict those URLs are Safe or not and if any google form found then same as aboveFor analyzing the text made a manual dataset on different ads and analyze which ads are influencing people in which way so, finetuned a transformer model 'Bert-base-uncased' then build a model to classify those texts, got 97% accuracy within that small data, made a confidence model that will show in which prediction the model is more confident, stored near about 50k data took those confident prediction used to build a stronger dataset then apply the model and got near about 92% accuracy.		
hello ML	Machine Learning Content Developer	Feb '21 – May '21 (3 Months)
<ul style="list-style-type: none">Developed a GAN Model to generate synthetic images, explored some papers SimCLR, BYOL and wrote articles in itExplored and wrote articles about Semi-supervised learning, Image Classification, Error Analysis, LSTM etc		

ACADEMICS

Qualification	Institute	Board / University	Year	% / CGPA
BTech (CSE)	St. Thomas' College of Engineering and Technology, Kolkata	MAKAUT	2022	8.8/10 (Up to 6 th Semester)
XII	RamakrishnaVivekananda Mission,(BKP)	WBBSE	2018	69%
X	RamakrishnaVivekananda Mission,(BKP)	WBBSE	2016	75%

PUBLICATION

Presenter: "How vulnerable are you? A Novel Computational Psycholinguistic Analysis for Phishing Influence Detection"
18th International Conference on Natural Language Processing - December, 2021

PROJECTS

Zooskersky	Python
<ul style="list-style-type: none">Scrap the illegal information from the web then mined the data and made a perfect dataset for understanding the patternPlot a Histogram and a Graph by that Dataset we made, so it'll be easy for all to understand the focusing time for each wildlifeCertified as the Winning Project of ZooHackathon, 2019, intended to alert wildlife activists of these illegal activities	
Sign Language Live Predict	Python
<ul style="list-style-type: none">Developed a Hand-Gesture Recognition Model that converts American Sign Language to English text, per video-frameDeployed the strategy using PyTorch which would convert ASL to English, Live, with a test-accuracy of 96.6 percentRecognized as one of the top finalists of the India-East Hackathon organized by the Association of Computing Machinery	
YouCure-HealthCare	Python
<ul style="list-style-type: none">Developed a Machine Learning Model (Logistic Regression) which will predict diseases based on your symptoms with the accuracy written and will give descriptions so that you get healed fast, used NLTK Package for the model to understand the textRecognized as one of the top finalists of the Amazon Smbhav Hackathon Organized by Amazon with Skillenza	

ACHIEVEMENTS AND CERTIFICATES

Winner of ZooHackathon 2019, Regional organized by World Wide Fund for Nature	November, 2019
Top Finalist of ACM India-East Hackathon organized by Association of Computing Machinery	February, 2020
Finalist of Amazon Smbhav Hackathon 2021 organized by Amazon & Skillenza	April, 2021

TECHNICAL SKILLS

- Data Science Frameworks:** Tensorflow, Keras, Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn, tableau
- Machine Learning:** Hands-on implementation of Regression, Classification and Clustering Algorithms
- Deep Learning:** DNN, CNN, Transformers, RNN, NLP, BERT, GPT, GAN, LSTM, GRU discriminative and generative models
- Data Management:** Mining, Cleaning, Preprocessing, Augmentation, Web-Scraping

HOBBIES AND INTERESTS

- Hackathons and Backend Development
- Statistics, Classical Machine Learning Algorithms, Deep Learning Architectures
- Football, Cricket, Badminton
